

Sink Guardian ST1 Brochure

How it Works

Internal Strainer Basket

Waste water from the sink is directed through the top of the Sink Guardian, where a strainer basket collects any solid debris, while water discharges to drain.

Under-Sink Installation

The ST1 Sink Guard is fitted into a 90mm punched hole in the base of the sink to prevent fine food particles entering the drain line.

Detachable Plug Stopper

The ST1 Sink Guard is supplied with a detachable rubber plug stopper, to allow the sink to be filled with water, when this is required.

1. Rubber Plug Stopper

2. Stainless Steel Filter Basket

Stainless Steel Container 3.

Connection to U-bend 4.
